The Dymo LetraTag LT-100T manual is available in English. If you're unsure about something not listed here, ask your question online or visit dymo.com for more information on obtaining tapes and accessories. To get started, insert six AA batteries as shown in Fig. A, and consider removing them if you won't be using the LabelMaker for a while. Here's how to load the cassette: The Labelmaker uses various label types - paper, plastic, and metallic. Insert the cassette according to Fig. B and press until it clicks into place, as seen in Fig. C. Double-check that the cassette is properly aligned before closing the access door. The LetraTag features a display showing up to 6 characters plus a cursor and 5 indicators. These indicators indicate which features are selected. You can toggle power on or off with the ON/OFF switch, and the device will automatically shut off if no keys are pressed for two minutes. The last label printed will be retained in memory. Note that removing batteries for more than a few seconds may result in lost memory. Finally, refer to the following key combinations: CAPS 123456 = box/underline; B = BIG CAPS STYLE; 123 STYLE = outline/italic; and shift key (AUS/NZ/NZ).
